(a) one cycle, $\varepsilon = 0.35$ (m and rad)
1: forward
2: turn left
3: backward
4: turn right
net motion $\approx \varepsilon^2[A, B]$: sideways
(b) repeating it walks the robot sideways
10 cycles, $\varepsilon = 0.2$:
net (0.04, −0.40) m
heading 0°
